

CSE437 Homework 2

In this homework, a team of three students will make a presentation about their assigned topic. The topics are from the ongoing conference, CPPCON 2022, which can be watched on YouTube channel <https://www.youtube.com/user/CppCon/playlists>.

The titles to be covered are listed in an Excel Worksheet that is shared on Teams, so at each line on the worksheet, three names are expected.

You are supposed to select an available title from the list and put your name in one of three options next to the title. If all positions are already occupied for that topic, pick another one. Then, watch the talk that you picked carefully, and try to understand comprehensively. Afterwards, create PowerPoint presentation that contains a 15-minute summary of the talk.

All the presentations should be submitted on Teams before the first presentation date, although a group of students will make their presentations in the next week.

Please consider that these presentations cover new topics, so understanding them may require quite an effort. You will need to spend this effort to get a decent grade for your midterm.

Rules regarding the presentations are given below.

Presentation

- Due no later than 19th December 2022.
- Should contain 12-15 pages including the title and “thanks” slide
- Should be presented in 15 minutes (overtime will cause penalty points, so rehearsal is recommended)
- In relevant topics, an example code snippet explained by the presenter will have a strong positive impact.
